

The Journal of

Membrane Biology

An international journal

**for studies on the structure, function and genesis
of biomembranes**

Volume 98 1987

Editorial Board

W.R. Loewenstein, Miami, Editor-in-Chief

Q. Al-Awqati, Columbia

G. Blobel, Rockefeller

D. Branton, Harvard

P. Cuatrecasas, Glaxo

J.M. Diamond, California, L.A.

D. Engelman, Yale

S. Fleischer, Vanderbilt

J.G. Forte, California, Berkeley

G. Guidotti, Harvard

J. Handler, N.I.H.

D.A. Haydon, Cambridge

A. Helenius, Yale

L. Heppel, Cornell

W.L. Hubbell, California, L.A.

R.B. Kelly, California, S.F.

A. Klug, Cambridge

P. Läuger, Konstanz

S.E. Luria, MIT

E.A.C. MacRobbie, Cambridge

V.T. Marchesi, Yale

D.J. Fritts, Assistant to the Editor

H.M. McConnell, Stanford

S. McLaughlin, SUNY, Stony Brook

I. Mellman, Yale

C. Miller, Brandeis

H. Murer, Zurich

Y.A. Ovchinnikov, USSR Acad. Sci. Moscow

G.E. Palade, Yale

Carlsberg Research Communications

Title No. 274

ISSN 0105-1938

Continuation of
Comptes Rendus Des Travaux Du Laboratoire Carlsberg
Founded 1878

Editorial Board: S. O. Andersen, H. Klenow, E. Lund
Production Editor: S. W. Rasmussen

The **Carlsberg Research Communications** can look back with justifiable pride on a tradition of publishing important research results, among them Kjeldahl's method for nitrogen determination, Christian Hansens' pure cultures of yeast, Sørensen's concept of pH, Schmidt's discovery of eel migration, Winge's discovery of sexuality in yeast, and Linderstrøm-Lang's concepts of protein structure and enzyme function.

Today, **Carlsberg Research Communications** is a source of comprehensive information on the work of the Carlsberg research establishments. These include the departments of chemistry and physiology of the Carlsberg Laboratory, the department of brewing chemistry, biotechnology and brewing technology of the Carlsberg Research Laboratory, and the Biological Institute of the Carlsberg Foundation.

The laboratories are involved in fundamental and applied research in the fields of biochemistry, cell and molecular biology, genetics, microbiology, and plant and animal physiology. With these research activities, the Carlsberg Breweries and the Tuborg Breweries endeavour to serve the advancement of science and technology.

Recently published articles include:

Van Heeswijk, Roncero: High frequency transformation of *Mucor* with recombinant plasmid DNA.

Britten: Mobile elements and DNA repeats.

Poulsen: Two mRNA species differing by 258 nucleotides at the 5' end are formed from the barley chloroplast *rbcl* gene.

Giese, Hopp: Influence of nitrogen nutrition on the amount of hordein, protein Z and β -amylase messenger RNA in developing endosperms of barley.

Breddam: Chemically modified carboxypeptidase Y with increased amidase activity.

Godtfredsen, Rasmussen, Ottesen, Mathiasen, Ahrenst-Larsen: Application of the acetolactate decarboxylase from *Lactobacillus casei* for accelerated maturation of beer.
